## 2015 Fall Workshops

### Special Milky Way Workshop

The Fall Workshop season will start off with a bang with a special Milky Way photo workshop. Join me on August 15th for a photo trip workshop to Mt. Rainier to photograph sunset at Reflection Lakes and the Milky Way from several different locations. This special workshop also includes the opportunity for a full day session of Lightroom and Photoshop/ Photoshop Elements to learn how to process your landscape and nightscape images. See p. 2 for more details.

### Fall Workshops

This fall, the beginning Lightroom and Photoshop CC/ Photoshop Elements workshops and the Intermediate Lightroom and Photoshop CC/Photoshop Elements workshops will be combined into one beginning and one intermediate workshop. I am doing this because Adobe's raw editor in Lightroom and Photoshop can be used for most of our post-processing with the layer ability of Photoshop and Photoshop Elements taking care of the rest.

The new format for the Advanced Photography Workshops has been a great success and will be continued this fall. Flash photography is being added to the line-up. This workshop will explore creative uses of both the built-in and external flash.

- Classes take place in the Coach House on the grounds of the Capitol Museum
- Classes are held on Saturdays

---

## Special Workshop: Shooting the Milky Way at Mt. Rainer National Park

Join Rosalind for a magical evening and night of taking sunset and Milky Way pictures on August 15, 2015. We will start out at the Coach House with 1.5 hours of instruction and getting our equipment ready. We will then head for Reflection Lakes at Mt. Rainier with a couple of stops along the way. We'll do sunset at Reflection Lakes and then head to Paradise to eat a quick supper. After supper we will head to several locations to shoot the Milky Way, star trails and do some light painting. If we are lucky, we might even see some Northern Lights. After we finish, we will head home to Olympia.

Then join me on September 12, 015 to learn how to process your pictures using Lightroom or the Raw Editor in PS CC or Photoshop Element. I have broken the experience into three parts so that you can get take as much as you like. We will talk very briefly about post-processing during our instructional time at the Coach House on 8/15.

---

### 8/15/2015 Mt. Rainer Milky Way Photo Trip

Please note that the special nature of this trip requires a liability waiver to be signed. The waivers will be available to sign at class on 8/15.

# Rosalind Philips Photography Workshops

## Beginning Digital Photography

This half day workshop is an introduction to the digital camera. Bring your camera, your manual, and two images that you are pleased with and two that you are not. We cover basic camera controls, beginning composition and exposure techniques. We will focus on how to use the histogram to achieve the correct exposure. This is a hands-on workshop, be prepared to take lots of images and to share the images with the rest of the group if you feel comfortable.

Dates: 9/19/2015 and 10/24/2015 from 9 am - 1 pm

## Intermediate Digital Photography

This workshop is for beginning and intermediate digital photographers and is a continuation of the Beginning Digital Photography workshop. In this workshop the focus is on how properly compose and expose photographs. We will be spending the majority of our time taking pictures and critiquing them.

Dates: 9/19/2015 and 10/24/2015 from 2:00 pm - 6:00 pm

## Advanced Digital Photography

This workshop is for beginning and intermediate digital photographers and is one that you can take over and over again. Each session focuses in depth on a different aspect of photography. Topics scheduled this year include waterfall photography, sensor cleaning, landscape photography, macro photography and night photography. Topics may change due to workshop enrollment numbers.

### Waterfall Photography

Have you ever taken a photograph of a waterfall and been disappointed with the results? If so, then this half day workshop is for you. At this workshop we learn will how to take good waterfall images, go to Tumwater Falls and take pictures, and then return to the Coach House to look at our images and see how we did. We will also talk about some editing techniques for making those waterfalls really pop.

Date: 10/17/2015 from 9:00 am - 1:00 pm

### Night Photography

It is so fun to take photographs after dark. In this hands-on workshop we will some techniques on how to take night-time photographs and then go outside and practice the techniques. Afterwards we will look at our images and see how we did. We will also talk about some editing techniques for making those images really pop.

Date: 11/7/2015 from 4:00 - 9:00 pm

### Flash Photography

Using flash with your photography can be lots of fun. In this hands-on workshop you will learn how to creatively use flash both on and off the camera. It will be helpful if you have your own external flash; I will have some that you can try if you are using a Canon or Nikon DSL.

Date: 10/17/2015 from 2:00 - 6:00 pm

## Introduction to Lightroom/Photoshop CC/ Photoshop Elements

This computer workshop is for beginning and intermediate photography computer users. This half day workshop is an introduction to Lightroom and Photoshop CC/Photoshop Elements. Bring your laptop, your camera, your card reader or cord to attach your camera to your laptop and several images that you would like to process. We cover how to get your images into the computer, how to organize them, and basic processing skills such as exposure compensation, white balance, cropping, selection techniques and saving images in different formats. This is a hands-on workshop, be prepared to dig in. Those that want to share images will have an opportunity to do so.

Dates: 9/12/2015 and 11/7/2015 from 9:00 am - 1:00 pm

## Intermediate Lightroom/Photoshop CC/Photoshop Elements

This computer workshop is for beginning and intermediate photography computer users. Lightroom 6 and Photoshop CC/ Photoshop Elements 11/12/13 are the programs that will be used. Other applications will be mentioned. We will quickly review common photo processing and focus on using layers and how to share your work with the world.

Dates: 11/7/2015 from 2:00 pm - 6:00 pm

# Rosalind Philips Photography Workshops

## Digital Photography Course

I can hardly wait for this popular course to start again on 9/17/2015. This 8-week class gives you the opportunity to push your photographic and computer skills to new heights. The basic format starting with the second class will be to review and discuss the week's assignment images during the first half the class and to learn (do) a new topic during the second half. Critiquing photographs will be an integral part of every class. You will need to bring your camera and laptop to every class.

One of the great things about this class is that you can take it over and over again. Each term we do the topics in a different way so that it is always new for everyone. The Coach House is a beautiful venue and during the fall we spend as much time as we can outdoors working on our skills. In addition, there is always a field trip somewhere. For example, last fall we spent a delightful evening shooting at Percival Landing.

Week 1 – Basic Camera and Photography Techniques

Week 2 – Composition and Exposure - Using one focal length

Week 3 – Composition and Exposure - Bracketing

Week 4 – Composition and Exposure - Field Trip

Week 5 – Composition and Exposure - Portraits

Week 6 – Composition and Exposure - Macro Photography

Week 7 – Presenting Your Work - Portfolios

Week 8 - Next Steps

Helping you make the most of your photography through camera and computer workshops

Rosalind Philips Photography

Rosalind Philips, photographer, has pursued her love of the outdoors through photography. Inspiration started early in childhood from reading Gerald Durrell's animal travelogues, Ernest Shackleton's journal about the Endurance, and Charles Darwin's Voyage of the Beagle; and from the exploration of nature during family picnics and at summer camp. Photography was a family activity. Many days were spent learning how to capture the magic of family vacations with the camera. Rosalind began to focus on birds during her teens and has become an avid birdwatcher. Therefore, much of her photography focuses on birds, particularly on the Heron family. Rosalind taught mathematics and science for 20 years. She traveled the country teaching other teachers how to use technology as an integral part of the classroom. Her work has been published in the coffee table book, Artists of the West.
