Fall Classes

This fall, the class line-up is different than it has been in the past. The only four-hour classes offered will be beginning and intermediate photography. The eight-week class will not be offered. Instead there will be a four-week class on water droplet photography and a three week class on long exposure photography.

The regular line-up will return in January 2017.

grounds of the Capitol Museum

- Classes are held on Saturdays

Photography Classes

\$130 for a four-hour beginning or intermediate,
 \$234 for a package of two four-hour classes (beginning and intermediate)

Brand New for Fall 2016

Water Droplet Photography

This class is for adventuresome souls who are not afraid to get their hands wet. We will be exploring the world of droplet photography. This is a class where you will learn how to take photographs of droplets hitting the surface of a liquid, photograph reflections in droplets, learn the fine art of droplet placement on an object and how to process those images using Lightroom, Photoshop or whatever photo processing software you use.

This is a four week class that will be held from 6:30—9:30 pm on 9/15/16, 9/22/16, 9/29/16 and 10/6/16 at the Coach House in Olympia, WA. The cost is \$175 and includes consumable supplies. The fall discount coupon is not valid for this class.

For this class you will need a DSLR or mirrorless camera, a tripod, macro lens or telephoto lens, a camera remote, extra camera battery, 2 bright flashlights, an external flash (optional but having one makes a big difference), a spray bottle, a medium sized dark colored bowl, and a small pan to catch the overflow (a brownie pan is perfect).

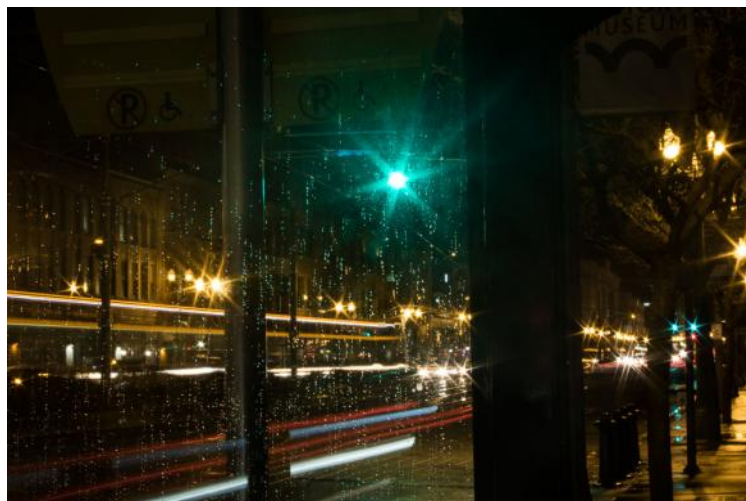

Long Exposure Photography

This class explores long exposure photography. Mostly we will be taking photographs in the dark. We will also paint with light, learn some daytime long exposure techniques and how to process our images using Lightroom, Photoshop or whatever photo processing software you use.

This is a three week class that will be held from 6:30—9:30 pm on 10/20/16, 10/27/16 and 11/03/16 at the Coach House in Olympia, WA. The cost is \$150 and includes consumable supplies. The fall discount coupon is not valid for this class.

For this class you will need a DSLR or mirrorless camera, a tripod, wide angle lens and/or medium telephoto lens, a camera remote, extra camera battery, 2 bright flashlights and a plastic bag that will fit over your camera and lens to protect it from the weather.

Rosalind Philips Photography Classes

Beginning Digital Photography

This half day class is an introduction to the digital camera. Bring your camera, your manual, and two images that you are pleased with and two that you are not. We cover basic camera controls, beginning composition and exposure techniques. We will focus on how to use the histogram to achieve the correct exposure. This is a hands-on class, be prepared to take lots of images and to share the images with the rest of the group if you feel comfortable.

Dates: 9/17/16 or 10/22/16 from 9 am - 1 pm

Intermediate Digital Photography

This class is for beginning and intermediate digital photographers and a continuation of the Beginning Digital Photography class. In this class the focus is on how properly compose and expose photographs. We will be spending the majority of our time taking pictures and critiquing them.

Dates: 9/17/16 or 10/22/16 from 2:00 pm - 6:00 pm

Helping you make the most of your photography through camera and computer classes

Rosalind Philips Photography

Rosalind Philips, photographer, has pursued her love of the outdoors through photography. Inspiration started early in childhood from reading Gerald Durrell's animal travelogues, Ernest Shackleton's journal about the Endurance, and Charles Darwin's Voyage of the Beagle; and from the exploration of nature during family picnics and at summer camp. Photography was a family activity. Many days were spent learning how to capture the magic of family vacations with the camera. Rosalind began to focus on birds during her teens and has become an avid birdwatcher. Therefore, much of her photography focuses on birds, particularly on the Heron family. Rosalind taught mathematics and science for 20 years. She traveled the country teaching other teachers how to use technology as an integral part of the classroom. Her work has been published in the coffee table book, Artists of the West.

Class Dates

Beginning Photography
9/17/16 and 10/22/16 from 9 am - 1 pm
